PRI Principles for Responsible Investment

PUBLIC TRANSPARENCY REPORT

2024

Landkreditt Forvaltning AS

Generated 25-11-2024

About this report

PRI reporting is the largest global reporting project on responsible investment. It was developed with investors, for investors.

PRI signatories are required to report publicly on their responsible investment activities each year. In turn, they receive a number of outputs, including a public and private Transparency Report.

The public Transparency Reports, which are produced using signatories' reported information, provide accountability and support signatories to have internal discussions about their practices and to discuss these with their clients, beneficiaries, and other stakeholders.

This public Transparency Report is an export of the signatory's responses to the PRI Reporting Framework during the 2024 reporting period. It includes the signatory's responses to core indicators, as well as responses to plus indicators that the signatory has agreed to make public.

In response to signatory feedback, the PRI has not summarised signatories' responses – the information in this document is presented exactly as it was reported.

For each of the indicators in this document, all options selected by the signatory are presented, including links and qualitative responses. In some indicators, all applicable options are included for additional context.

Disclaimers

Legal Context

PRI recognises that the laws and regulations to which signatories are subject differ by jurisdiction. We do not seek or require any signatory to take an action that is not in compliance with applicable laws. All signatory responses should therefore be understood to be subject to and informed by the legal and regulatory context in which the signatory operates.

Responsible investment definitions

Within the PRI Reporting Framework Glossary, we provide definitions for key terms to guide reporting on responsible investment practices in the Reporting Framework. These definitions may differ from those used or proposed by other authorities and regulatory bodies due to evolving industry perspectives and changing legislative landscapes. Users of this report should be aware of these variations, as they may impact interpretations of the information provided.

Data accuracy

This document presents information reported directly by signatories in the 2024 reporting cycle. This information has not been audited by the PRI or any other party acting on its behalf. While this information is believed to be reliable, no representations or warranties are made as to the accuracy of the information presented. The PRI has taken reasonable action to ensure that data submitted by signatories in the reporting tool is reflected in their official PRI reports accurately. However, it is possible e that small data inaccuracies and/or gaps remain, and the PRI shall not be responsible or liable for such inaccuracies and gaps.

Section 1. Our commitment

Why does your organisation engage in responsible investment?

• What is your organisation's overall approach to responsible investment, and what major responsible investment commitment(s) have you made?

At Landkreditt Forvaltning, we are dedicated to responsible investments that drive positive environmental and social change in the long term. Our investment strategy focuses on selecting profitable and well-managed companies that align with our vision for a sustainable future. We believe that responsible investments not only mitigate risks but also generate strong returns for our clients.

We incorporate various approaches to responsible investments:

ESG Integration: We have integrated environmental, social, and governance (ESG) factors into our investment strategy. We diligently monitor the companies we invest in to ensure they have a robust ESG strategy and actively work towards achieving their ESG goals. Our findings are documented annually in our comprehensive "sustainability library." We have also worked on our ESG reporting on SFDR level 1 which provides our investors with clear and concise insights into our responsible investment initiatives.

Exclusions: We exclude companies that engage in unacceptable risks. This includes severe environmental damage, human rights violations (such as child labor and employee rights abuses), widespread corruption, and other serious breaches of ethical norms. We also avoid investments in companies and industries involved in weapons production, tobacco, and pornography. Our exclusions align with the recommendations of the Council on Ethics for the Government Pension Fund (NBIM) in Norway.

Active Ownership: We believe in making a difference by exercising active ownership. This involves engaging in direct dialogues with companies, exercising voting rights at relevant general and bondholder meetings, and collaborating with industry associations and investor groups that share our interests. Our ownership dialogues are guided by the principles outlined by the Norwegian Committee for Corporate Governance (NUES).

Through the combination of these approaches, we strive to create a positive impact by investing responsibly and contributing to sustainable development. Our commitment to responsible investments extends not only to the present but also to the future generations we aim to benefit.

Section 2. Annual overview

Discuss your organisation's progress during the reporting year on the responsible investment issue you consider most relevant or material to your organisation or its assets.

Reflect on your performance with respect to your organisation's responsible investment objectives and targets during the reporting year. Details might include, for example, outlining your single most important achievement or describing your general progress on topics such as the following (where applicable):

- · refinement of ESG analysis and incorporation
- · stewardship activities with investees and/or with policymakers
- collaborative engagements
- · attainment of responsible investment certifications and/or awards

2023 marked significant strides in our Environmental, Social, and Governance (ESG) incorporation, reflecting a period of productivity and advancement.

Throughout the year, we incorporated SFDR level 2 standards by completing and publishing the SFDR's Regulatory Technical Standards (RTS) and creating a sustainability page where we post information about our funds and what we do to be more sustainable. Five out of our six funds have been classified as a "Category 8" fund, indicating that these funds "promote environmental or social characteristics." Additionally, ESG considerations have become important to our daily operations and is featured in all our internal investment meetings.

Annually, we update our sustainability library to monitor companies' progress toward their sustainability objectives. In 2023, our efforts to expand the library with comprehensive data facilitated a deeper understanding of the companies in which we invest. Our evaluation process enables us to make informed investment decisions that prioritize sustainability. We collaborate with SEB, who assess our funds on multiple sustainability factors, including the EU taxonomy, UN Sustainable Development Goals, and ESG (Environmental, Social, and Governance) factors. Fund assessment takes place once a year and is utilized to evaluate both our funds and companies' sustainability efforts. These assessments are conducted using SEB's proprietary models and are based on both reported and estimated data.

Furthermore, we have introduced our ESG checklist and our ESG watchlist. Before a fund manager includes a new company in the fund, the ESG checklist must be completed and archived. If a company fails to meet the minimum requirements outlined in the checklist, the manager must provide justification for why they wish to include the company in their fund. (These companies are automatically placed on the watchlist, and the manager may inquire with the company about their ESG efforts.) The checklist supports portfolio managers by facilitating the creation of ESG profiles for the companies in which we invest.

Upon discovering violations (ESG) within companies we invest in; the fund manager will contact the company's sustainability officer with relevant information. If we find that a company is in breach of our "Guidelines for sustainability and responsible investments," we will place the company on a watchlist and take actions that best safeguard the interests of shareholders. Such actions may involve various measures, including dialogue with the companies, collaboration with other investors, and an assessment of ownership. The ESG watchlist serves as an effective mechanism for holding companies accountable for their actions.

Throughout the year, we have created a plan for 2024 outlining our approach to voting in Annual General Meetings for the companies within our funds. While our voting frequency in 2023 was limited to one instance, we anticipate a significant increase in participation during 2024.

We have also reported on the Norwegian Transparency Act in 2023. The Transparency Act aims to ensure that businesses respect fundamental human rights and decent working conditions while also ensuring public access to information. The Transparency Act came into effect on July 1, 2022, and the first disclosure was published June 30, 2023. Landkreditt Forvaltning is subject to the Transparency Act through the Landkreditt Group. The group provides information on the Transparency Act on our shared sustainability page, and information on how Landkreditt Forvaltning manages its own suppliers is available in this disclosure. The outcome indicates a low risk of human rights violations and inadequate working conditions among our direct suppliers or business partners.

As a part of the Landkreditt Group we developed a comprehensive sustainability strategy for both Landkreditt Forvaltning and the Landkreditt Group as a whole. Through this collaborative effort, we've developed a roadmap for both growth and sustainability. Our primary objective is to ensure that 75% of our funds are labeled as funds that promote environmental or social characteristics (Article 8).

Landkreditt Forvaltning is still associated with Norsif, the Norwegian Forum for Responsible and Sustainable Investments, the VFF (Verdipapirfondenes forening)'s ESG committee and the UN's Global Compact. By proactively engaging in these practices, we strive to align our investments with sustainable principles and contribute to positive environmental and social outcomes.

Section 3. Next steps

What specific steps has your organisation outlined to advance your commitment to responsible investment in the next two years?

Over the next two years, we have several important reporting obligations and sustainability initiatives on our agenda. We are committed to fulfilling SFDR level 2 reporting requirements and implementing the Principle Adverse Impact (PAI) framework. The PAI framework will be published on our website within June 30th, 2024.

We will continue to search for the most effective ways to incorporate sustainability in our day-to-day work. We will also continue with all regulatory reporting.

By fulfilling our reporting obligations, analyzing suppliers, and incorporate sustainability in our day-to-day work, we are dedicated to advancing our commitment to responsible practices. These initiatives will facilitate our growth while ensuring that sustainability remains at the core of our operations.

Section 4. Endorsement

'The Senior Leadership Statement has been prepared and/or reviewed by the undersigned and reflects our organisation-wide commitment and approach to responsible investment'.

Name

Anders Petter Wik

Position

CEO

Organisation's Name

Landkreditt Forvaltning AS

A ()

'This endorsement applies only to the Senior Leadership Statement and should not be considered an endorsement of the information reported by the above-mentioned organisation in the various modules of the Reporting Framework. The Senior Leadership Statement serves as a general overview of the above-mentioned organisation's responsible investment approach. The Senior Leadership Statement does not constitute advice and should not be relied upon as such. Further, it is not a substitute for the skill, judgement and experience of any third parties, their management, employees, advisors and/or clients when making investment and other business decisions'.

GOVERNANCE

ROLES AND RESPONSIBILITIES

| Indicator | Type of indicator | Dependent on | Gateway to | Disclosure | Subsection | PRI Principle |
|-----------|-------------------|--------------|------------------------|------------|----------------------------|---------------|
| PGS 11 | CORE | N/A | Multiple indicators | PUBLIC | Roles and responsibilities | 1 |

Which senior level body(ies) or role(s) in your organisation have formal oversight over and accountability for responsible investment?

☑ (A) Board members, trustees, or equivalent

(B) Senior executive-level staff, or equivalent

Specify:

As a small company with a staff of 12 employees, our organization places a strong emphasis on responsible investments, fostering oversight and accountability. Our senior leader plays an important role, in overseeing investment decisions, approving policies, and providing valuable support to our team members with any queries related to ESG considerations.

☑ (C) Investment committee, or equivalent

Specify:

Within our company, the investment committee holds the responsibility of determining which companies to invest in. The portfolio manager shares information about a potential company that they want to invest in with the ESG analyst. The ESG analyst conducts a thorough screening of the company to ensure it aligns with our ESG standards and criterias. If a company fails to meet the minimum requirements in the checklist, the company is automatically placed on a watchlist.

☑ (D) Head of department, or equivalent

Specify department:

As a small company with a staff of 12 employees, the head of the department is the same as our senior executive-level staff. In general, we all have formal oversight over and accountability for responsible investments.

• (E) None of the above bodies and roles have oversight over and accountability for responsible investment

During the reporting year, did your organisation publicly disclose details of your engagement with policy makers conducted as part of your responsible investment approach, including through external investment managers or service providers?

 $\hfill\square$ (A) We publicly disclosed all our policy positions

 \Box (B) We publicly disclosed details of our engagements with policy makers

• (C) No, we did not publicly disclose details of our engagement with policy makers conducted as part of our responsible investment approach during the reporting year

Explain why:

The information can be provided upon request.

CLIMATE CHANGE

| Indicator | Type of indicator | Dependent on | Gateway to | Disclosure | Subsection | PRI Principle |
|-----------|-------------------|--------------|------------|------------|----------------|---------------|
| PGS 41 | CORE | N/A | PGS 41.1 | PUBLIC | Climate change | General |

Has your organisation identified climate-related risks and opportunities affecting your investments?

 \Box (A) Yes, within our standard planning horizon

(B) Yes, beyond our standard planning horizon

Specify the risks and opportunities identified and your relevant standard planning horizon:

Within our funds, we include companies operating in the oil sector. We acknowledge the risks associated with global warming and how important it is for these companies to adapt and enhance their environmental performance to meet sector-specific requirements. While these risks are present, we also see significant opportunities within the sector. These companies possess substantial resources that can be allocated toward conducting research and implementing innovative measures to promote environmental sustainability within the oil sector. We recognize the potential for positive change and the capacity of these companies to contribute to a more environmentally friendly future in their industry. These companies have also set clear goals in order to reach "Net Zero" by 2050. We still have companies operating in the oil sector in our portfolios in 2023.

• (C) No, we have not identified climate-related risks and/or opportunities affecting our investments

| Indicator | Type of indicator | Dependent on | Gateway to | Disclosure | Subsection | PRI Principle |
|-----------|-------------------|--------------|------------|------------|----------------|---------------|
| PGS 41.1 | CORE | PGS 41 | N/A | PUBLIC | Climate change | General |

Does your organisation integrate climate-related risks and opportunities affecting your investments in its overall investment strategy, financial planning and (if relevant) products?

(A) Yes, our overall investment strategy, financial planning and (if relevant) products integrate climate-related risks and opportunities

Describe how climate-related risks and opportunities have affected or are expected to affect your investment strategy, financial planning and (if relevant) products:

Our investment strategy focuses on selecting profitable and well-managed companies that align with our vision for a sustainable future. We incorporate various approaches to responsible investments such as exclusions, integration, and voting. We also conduct a "prescreening" prior to investing in new companies to ensure that their sustainability efforts align with and meet our minimum requirements. Furthermore, our funds undergo annual screening, enabling us to track progress and mitigate risks by identifying companies that may be underperforming relative to their established goals.

• (B) No, our organisation has not yet integrated climate-related risks and opportunities into its investment strategy, financial planning and (if relevant) products

| Indicator | Type of indicator | Dependent on | Gateway to | Disclosure | Subsection | PRI Principle |

Does your organisation have a process to identify, assess, and manage the climate-related risks (potentially) affecting your investments?

(A) Yes, we have a process to identify and assess climate-related risks

(1) Describe your process

Screening underlying securities both through a service provider and internally by our ESG analyst. The pre-screening process is reviewed by our compliance officer.

(2) Describe how this process is integrated into your overall risk management

We conduct screenings before including new securities in our funds. Additionally, we conduct annual screenings of the companies we invest in. During these evaluations, we carefully review each company's progress toward their ESG goals. By regularly monitoring their performance, we ensure that they continue to make improvements in line with our sustainability objectives.

(B) Yes, we have a process to manage climate-related risks

(1) Describe your process

Through 2023, we established an ESG watchlist. Upon discovering violations (ESG) within companies we invest in; the fund manager will contact the company's sustainability officer with relevant information. If we find that a company is in breach of our "Guidelines for sustainability and responsible investments," we will place the company on a watchlist and take actions that best safeguard the interests of shareholders. Such actions may involve various measures, including dialogue with the companies, collaboration with other investors, and an assessment of ownership. The ESG watchlist serves as an effective mechanism for holding companies accountable for their actions.

(2) Describe how this process is integrated into your overall risk management

Our compliance officer monitors this list on a monthly basis, overseeing our company's risk management. Additionally, the ESG watchlist is regularly reviewed by our ESG analyst and portfolio managers. The portfolio manager reports any breaches, while the ESG analyst updates the watchlist accordingly. Following the placement of a company on the watchlist, potential next steps may involve dialogue with the companies, collaboration with other investors, and an assessment of ownership.

• (C) No, we do not have any processes to identify, assess, or manage the climate-related risks affecting our investments
